EDUCATION

2024 - 2028

MARWADI UNIVERSITY

- Bachelor of Technology (Information Technology)
- CGPA: 9.31 / 10

TECHNICAL SKILLS

Programming languages

Python, Javascript, C, C++

Web development

Self-learned web development;
react, nodejs

Tools

Git/Github, VS code, Google Colab

INTERESTS

Machine learning,
full-stack development,
Generative AI,
Data Structures & Algorithms

PROFILE SUMMARY

Motivated second-year Information Technology student with a good foundation in Data Structures and Algorithms (DSA), actively improving problem-solving skills through consistent practice. Skilled in Python, JavaScript, and C/C++, with hands-on experience in machine learning and full-stack development projects. Eager to apply analytical thinking and learn in a real-world internship environment.

PROJECTS

AI Crop Yield Prediction

- Working on predicting crop yield using basic ML concepts and publicly available data (learning-oriented project).
- Using Python and Google Colab to experiment with models and understand the ML workflow.

Health Chatbot - "SpashttGPT"

- Building a simple health-focused chatbot to flag AI biases and risks
- Using web technologies and Python to experiment with basic NLP and conversational flows.

HACKATHONS

Intellify Hackathon

- Collaborated in developing innovative ML-based project concepts
- Gained experience in rapid prototyping and teamwork

Smart India Hackathon (SIH)

- Contributed project concept in agri-tech domain under "AI for Agriculture."
